Examiner's Detailed Office Action

1. This Office Action is responsive to application **09/902,263**, filed **July 10, 2001**.
2. **Claims 1-11** have been examined.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

The invention as disclosed in **claims 1-11** are rejected under 35 U.S.C. 101 as being non-statutory subject matter. Applicant's invention appears to be directed towards the technological arts. However, applicant's claim language is not limited to a practical application. In particular, examiner has found the claimed subject matter, to be one of three exclusions recognized, outside the statutory category of invention, i.e., *an abstract idea*. The manipulation of an *abstract idea* is not concrete or tangible.

Moreover, applicant's claimed invention relates to non-functional "Descriptive Material" intended to constitute a data structure. However, it *lacks* the "functional descriptive material"

Art Unit: 2121

which is normally construed to be a data structures and computer programs which impart functionality when employed as a computer component.

Furthermore, the claims are not claimed to be practiced on a computer-readable medium. This is to say, it is conceivable that applicant's invention, can be worked out on a medium that is *not* a computer-readable medium. Examiner contends, on that basis alone, the claims are clearly nonstatutory. As a result, examiner will *not* speculate as to the intended meaning. Whereas applicant discloses no "certain substances" that have been "transformed or reduced" and applicant's claim language disclose no *specific* computer-readable medium.

4. Therefore, claims 1-11 are rejected under 35 USC § 101.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 1-11 are rejected under 35 U.S.C. 112, first paragraph. Specifically, if the application fails as a matter of fact to satisfy 35 U.S.C. § 101, then the application also fails as a matter of law to enable one of ordinary skill in the art to use the invention under 35 U.S.C. § 112.”);

In re Kirk, 376 F.2d 936, 942, 153 USPQ 48, 53 (CCPA 1967) MPEP 2107.01 (IV)

Claim Rejections - 35 USC § 112

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. What are the specific knowledge requirements of an organization?

Conclusion

9. The prior art made of record and (listed of form **PTO-892**) not relied upon is considered pertinent to applicant's disclosure as follows. Applicant or applicant's representative is respectfully reminded that in process of patent prosecution i.e., amending of claims in response to a rejection of claims set forth by the Examiner per Title 35 U.S.C. The patentable novelty must be clearly shown in view of the state of the art disclosed by the references cited and any objections made. Moreover, applicant or applicant's representative must clearly show how the amendments avoid or overcome such references and objections. *See 37 CFR § 1.111(c).*
